DETAILED ACTION

1. Claims 1-19 are pending in this office action.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, 6-7, 10-11, 13-15, and 18, drawn to a system enabling a play portion, classified in **class 455, subclass 414.1**.
 - II. Claims 4, 8, and 16 drawn to a system for allowing an amusement place entry, classified in **class 705, subclass 65**.
 - III. Claims 5, 9, and 17 drawn to a system releasing charged play pieces, classified in **class 455, subclass 414.3**.
 - IV. Claims 12 and 19, drawn to a system for enabling operation of Internet information based on personal information, **class 700, subclass 94**.
2. Inventions I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.
 - In the instant case, invention I has separate utility than inventions II, III, and IV such as the invention associated with a control apparatus using a mobile communication terminal enabling a play portion according to personal information.
 - Invention II has separate utility than inventions I, III, and IV such as the invention associated with a control apparatus using a mobile communication terminal for allowing an amusement place entry according to personal information.

Art Unit: 2645

- Invention III has separate utility than inventions I, II, and IV such as the invention associated with a control apparatus using a mobile communication terminal for releasing charged play pieces according to personal information.
- Invention IV has separate utility than inventions I, II, and III such as the invention associated with a control apparatus using a mobile communication terminal enabling operation of Internet information based on personal information.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for each invention is not required for the other, restriction for examination purposes as indicated is proper. See MPEP § 806.05(d).

4. A telephone call was made to Applicants' representative, C. Bruce Hamburg (Reg. No. 22,389), on March 11, 2004, to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(i).

Art Unit: 2645

7. A shortened statutory period for response to this action is set to **expire 0 (zero) months and 30 (thirty) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the applicant (see 35 U.S.C 133, MPEP 710.02, 710.02 (b)).
